

## October In-Person Worship Survey Results

Thank you to the 76 people who filled out our second in-person worship survey! The information continues to be very useful for our leadership team as we try to chart the way forward during this unique time.

### Numerical Results

<b>If we were to offer our current in-person worship service weekly, how often would you attend?</b>			
0 = 60.53%	1 = 6.58%	2 = 6.58%	3+ = 26.32%
<b>If we continue to offer in-person worship once a month, how likely are you to seek in-person worship services at another church?</b>			
Very Unlikely = 63.51%	Not Now = 20.27%	Somewhat Likeley = 6.76%	Very Likely = 9.46%

### Notes from Comments

We noticed a few common issues around the RSVP process. Several people noted that they did not want to take someone else's spot. Others noted that they did not want to commit that far ahead of Sunday.

### Plan Moving Forward

- Add overflow seating in the fourth floor video worship space if needed
- Add ability to accept walk-up attendees subject to availability
- Email the congregation on Saturday to inform people how many walk-up spots are available
- If these steps increase our attendance to the point that our one worship service per month is full, we will look to add a second worship service monthly. We can similarly track capacity when we offer two worship services a month to determine when we have enough demand to explore weekly again.
